

*On September 12, 2003, two City of Scottsdale Green Building Program projects were presented with a prestigious Valley Forward Association Environmental Excellence Award.*

## BUILDINGS AND STRUCTURES - COMMERCIAL *FOOTHILLS ACADEMY*

Envisioning a living laboratory for academic and environmental learning, the leadership of Foothills Academy College Preparatory in Scottsdale commissioned a design that includes several environmental attributes. These include straw bale walls, undeveloped native habitat, open space, salvaged plant material, daylighting and natural drainage.

Weddle Gilmore Architects/Homes & Son Contractors Inc.

Roberts/Jones Associates, Inc./Redden Construction Inc.

## BUILDINGS AND STRUCTURES - COMMERCIAL *PINNACLE PRESBYTERIAN CHURCH SANCTUARY*

Creating a sanctuary resting between two large natural washes, the Pinnacle Presbyterian Congregation in Scottsdale commissioned a design that includes several environmental attributes. These include low slung forms in scale with the Sonoran site, a footprint that preserved naturally existing vegetation, low water use planting, natural shading, environmentally friendly building materials, and high performance insulation and glazing systems.
